

## Wallace Allan Watch Bracelet Size Guide

We want every watch that you buy from Wallace Allan to fit your wrist perfectly. This is why we offer a free watch bracelet adjustment on every purchase. Simply use our guide below and let us know your size when completing your order.

### WHAT TO DO

#### Step One.

Print this page out on an A4 sheet. Please ensure that it prints at 100% and not as 'scale to fit'.

#### Step Two.

Double check the size of the bracelet scale with a ruler.

#### Step Three.

If the bracelet guide is the correct scale, simply cut around the borders to make a paper bracelet.

#### Step Four.

Carefully punch holes through the two X's, cutting between the two to make a slit.

#### Step Five.

Place the guide around your wrist and point the end through the slit.

#### Step Six.

Pull the end of the bracelet until there is space for an index finger to fit through.

#### Step Seven.

Read the measurement in centimetres as it displays on the bracelet. This is your bracelet size! Make sure to let us know these details when you're checking out.

### PLEASE NOTE

Watches with a leather or nato strap come with punched holes, so you can adjust the size yourself.
